

MAIL ART

DADA COW 2023

rubber stamp project

Not long now and then it will be Christmas!

I give YOU* an individual rubber stamp with your name made of foam rubber with an LED laser. The stamp has the dimensions 95mm x 60mm.

I will only send you the finished moss rubber stamp by email. You have to make your own wooden printing plate.

You also need a stamp box with a box that is 100 mm long and 65 mm wide.

My wish is that a lot of Mail Art will be sent with this special postmark in the coming year.

It's enough, if you mark this post with "I'm participating!" comment I am also happy about your ideas and suggestions. Make sure I have your address to send you the gift before 12/24/2022.

* I am offering a total of 11 gifts! So be quick! Deadline for your request is 30.10.2022.

It would be a great if someone helps out in the documentation of the progress in 2023, for example by using what3words or openstreetmap where our cows are going... or setting up an archiv.

Best to you,

Juan
